

## **Environmental Policy**

SA Pipe Relining is committed to protecting the environment, instilling high environmental values in all employees and operating in an eco-friendly manner that conserves natural resources, minimises potential impacts on the environment and complies with all legislative and statutory environmental management requirements.

SA Pipe Relining will achieve these objectives by:

### **LEGISLATIVE COMPLIANCE**

Complying with all applicable environmental legislation, statutory authority guidelines and industry standards.

### **MANAGEMENT & MONITORING**

Providing the support and resources required in order to ensure compliance with statutory and Company environmental management requirements. We will establish processes to review the environmental aspects and impacts prior to undertaking the work and implement appropriate procedures to manage potential risk. We will implement mechanisms to report and record environmental incidents and noncompliance situations, and initiate remedial action to improve performance, rectify damage and prevent recurrent incidents.

### **CONTINUOUS IMPROVEMENT**

Striving to continuously improve the Company's environmental performance by implementing environment management procedures, regularly reviewing their effectiveness and continuing to develop new methods and systems to achieve higher standards of operation.

### **MINIMISING ENVIRONMENTAL IMPACT**

Operating in such a manner as to minimize, as far as is reasonably practical, any risk of adversely affecting the environment and to maintain the earth's natural resources.

### **POLLUTION & WASTE**

Implementing and encourage practices that minimise any potentially polluting discharges to the atmosphere or drains. We will strive to minimise pollution and waste by monitoring and controlling all scrap produced, optimising energy and water consumption, implementing internal recycling programs, and wherever practical using raw materials recycled from other sources.

### **COMMUNICATION & INFORMATION**

Providing information on the Company's environmental commitment and performance to the organisation through regular meetings, and internal information communiqués and we will continue to develop Company employee and contractor awareness of environmental obligations through education and training. All SA Pipe Relining employees will be accountable for the environmental performance of their respective areas of management and responsibility.
